

INDIAN SPACE ASSOCIATION (ISpA)

India International Space Conclave 2026 - 5TH EDITION

23 – 24 NOVEMBER 2026

NEW DELHI, INDIA

Theme: "ORBITAL HORIZONS: SECURING TOMORROW'S SPACE ECONOMY"

As space transitions from exploration to core economic and security infrastructure, the 5th Edition of the Indian International Space Conclave (IISC 2026) emerges as the definitive international summit in New Delhi. Hosted by the Indian Space Association (ISpA), the Apex Space Industry Body, this Two-Day flagship forum unites Global Aerospace Leaders, Commercial Space Pioneers, Policymakers, and Innovators to shape the multi-trillion dollar Space Economy. IISC 2026 bypasses conventional dialogue to focus entirely on actionable commercialization, orbital traffic management, resilient cross-border partnerships, and scalable market infrastructure.

The Conclave aims to create a unified platform for organizations and stakeholders dedicated to enhancing India's Space Capabilities and plans. With the distinguished presence of dignitaries from Government Sectors, Space Agencies, Embassies, International Trade Agencies, Consulting and Research Firms, Investment Firms, International Organizations, and the Private Space Industry-and Startups alongside Investors, Think Tanks, reputed Law Firms, Academia, Researchers, and Students, we will come together to chart the course for the Future of India's Space Sector.

Summit Scale & Global Footprint

1,300+ Elite Delegates representing two high-impact days of strategic alignment.

100+ International Enterprises at the pinnacle of Global Aerospace, SatCom, and Commercial Space Technology.

15+ Immersive Exhibitions showcasing next-gen manufacturing, commercial payloads, and advanced space capabilities.

Multilateral Powerhouses: High-level delegations from India, The United States, Europe, Japan, Australia, France, Italy, Southeast Asia, and emerging Global Space Ecosystems.

Core Thematic Pillars

The Conclave is meticulously structured around critical commercial and operational imperatives of the modern space age:

1. **Orbital Safety & Space Traffic Management (STM):** Establishing global norms for debris mitigation, active debris removal, and risk-based licensing to preserve long-term commercial viability.
2. **SatCom Resilience & Connected Infrastructure:** Addressing mega-constellation scaling, secure broadband architecture, spectrum allocation, and next-gen Earth Observation and Geospatial Analytics.
3. **Commercial Spaceflight & In-Orbit Services (IOS):** Unlocking market opportunities in satellite servicing, manufacturing in microgravity, orbital logistics, and commercial space station integration.
4. **Global Capital & In-Space Economics:** Catalyzing private equity, venture financing, cross-border joint ventures, public-private partnerships (PPPs), and commercialization frameworks for emerging space enterprises.
5. **Export-Import and ITAR:** Navigating global regulatory frameworks, technology transfer restrictions, and compliance mechanisms where platforms like INDUS-X, TRUST, and the DIU ecosystem can significantly enhance international market access and cooperation.
6. **Advanced ISR & Sensing:** Integration of Optical and SAR sensors with AI models to drive intelligence, surveillance, and reconnaissance breakthroughs.

Highlights & Formal Engagements

High-Level Inauguration & Strategic Milestones: Formal opening ceremonies and major commercial announcements charting the course of industry growth.

Institutional MOUs: Securing formal cooperation agreements and strategic pacts with International Counterparts and Global Industry Bodies.

The Industry Showcase: A dedicated exhibition enabling delegates to engage directly with Industry Leaders showcasing Indigenous and Global Space Technologies.

Industry Pitches: Curated opportunities for select companies to present mission-ready commercial solutions directly to procurement leaders and investors.

Fireside Chats: Exclusive dialogues with the leadership of the space establishment reflecting on the journey from Vision to Commercial Launch Readiness.

Global Outreach: High-level sessions engaging International Industry Leaders and diplomatic delegations to explore Cross-Border Trade, Technology Transfer, and Commercial Partnerships.

Day 1 and Day 2 Theme Composition

Day 1 – Enabling India’s Next Phase of Space Growth: Policy, Markets and Investment

The first day will focus on the commercial foundations of India’s growing Space Economy. Discussions will examine market opportunities, policy reforms, investment strategies and regulatory frameworks necessary for scaling India’s space industry. Sessions will cover the national vision for a US\$44 billion Space Economy, satellite communications and spectrum management, financing and insurance for NewSpace enterprises, the growth journey from start-up to unicorn, and the expanding role of Earth Observation and Geospatial Technologies in driving economic development.

Day 2 – Building a Trusted, Skilled and Sustainable Space Ecosystem

The second day will focus on the long-term sustainability of India's space ecosystem. Discussions will address safe and sustainable space operations, space traffic management, legal and regulatory frameworks governing international space commerce, responsible behavior in outer space, workforce development, industry–academia collaboration, youth engagement and entrepreneurship. The Conference will conclude with forward-looking discussions on India's future exploration ambitions, including lunar and planetary, missions, human spaceflight, emerging technologies and opportunities for greater international cooperation.

Why Attend

- Gain critical insights from leading experts across the Global Commercial Space Industry.
- Network directly with key stakeholders, venture capitalists, and decision-makers in the Space Sector.
- Explore high-value business, trade, and commercial collaboration opportunities.
- Stay updated on breakthrough market trends, regulatory updates, and innovations in space technology.
- Contribute to high-impact discussions shaping the future of India's Commercial Space Ecosystem and the Global Space Economy.

Position your enterprise at the forefront of the International Space Revolution. Engagement avenues are open for:
